Clients and Partners Ecosystem

Meet Abilix Soft

- Over 20 years we have been enhancing and accelerating the IT effectiveness and resolving IT issues for our clients.
- We partner with different businesses with different scale and locations. We approach each of them and their needs individually.
- Since 2012 we have focused on providing cloud services with professional support under the brand AbsCloud.
- In our work we put explicit focus on sustainable development and energy efficiency.

Data Center

AC DC

Safety and Security for Your Server Equipment

Data Center Location

AC☁DC is our completely renovated data center in Varna. The infrastructure offers a high level of connectivity and relies on the latest generation of technologies and equipment, covering TIER III requirements.

Our location is in close proximity to the North industrial zone in Varna and 1.5 km away from the city center offering access to multiple operators.

AC☁DC is the right choice for deploying server equipment for companies from the city and the Northeastern region of Bulgaria, as well as a suitable Disaster Recovery point for remote businesses.

What We Offer:

From budget options to solutions for large-scale projects

Shared Rackspace

Partial Cabinets and Full Cabinets, extra services such as own key and own cage

Internet suitable for the business needs – from budget options to premium DDOS Protected Internet connection

Additional services such as Remote Hands & Eyes, cabinet arrangement, cabinet accessories, etc.

Client Benefits:

Place your equipment in a safe environment offering all necessary conditions for optimal work and security and compliant with the necessary regulations

Save significant costs for building and maintaining systems on your own

Benefit from a higher level of security than the one you could achieve on your own

Smooth and easy connection with a preferred operator or point thanks to the network of providers in AC☁DC

Technical Advantages

Power Supply

Two independent power supplies
Electrical distribution boxes with individual fuses and electric meters
Diesel generators

Redundancy

UPS Redundancy
Redundant Cooling System
Redundant air conditioning

Fire Safety

Fire Fighting System
Fire Alarm
Fire-rated Armored doors

Connectivity

Redundant optical ring
Connection with VarnaIX and NetIX
Connection with over 100 operators

Physical Security

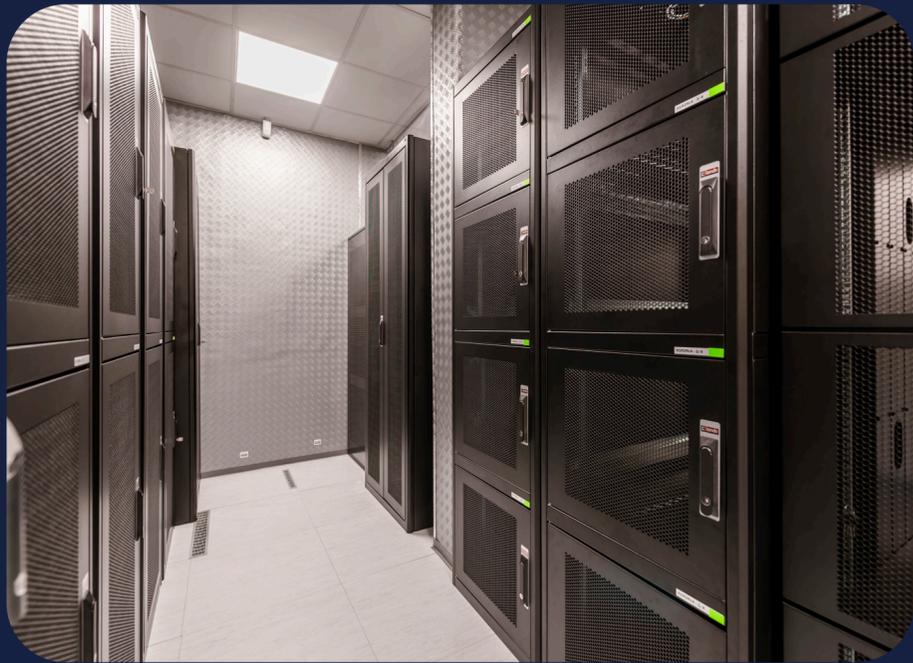

Access Control System
24/7 Video Surveillance

Certificates

Built on an integrated management system from the start, AC☁️DC (AbsCloud Data Center) quickly achieved ISO/IEC 27001:2022, ISO/IEC 20000-1:2018, and ISO 9001:2015 certifications – setting a high standard for quality and security.
